A COMPLETE DENTAL LABORATORY

Your Opinion Establishes Your Own Standards

You may know that Ticonium possesses superior physical properties. You may realize that it has been used for several years in hundreds of thousands of practical cases. You have probably seen repeated references in dental literature to its exclusive acceptance by colleges and its wide use in military laboratories. In spite of all of these recommendations, the quality of Ticonium remains subject to your opinion and from that opinion there is no redress.

If you have used Ticonium often, your opinion is of course favorable. If you have not used Ticonium recently, we hope that you will do so for your next case. Judge for yourself how easily the finished restoration slips to place, how well Ticonium serves over a period of years. Opinions based on experience with Ticonium constitute our most valuable reference.

Senate Bill 402 Against Unethical Dental Laboratories Defeated in House

Details of the defeat of Senate bill 402 in the House of Representatives are given. This bill was directed against those dental laboratories which advertised to and dealt directly with the public. A list of those state representatives who were for and those who were opposed to the bill, is given.

On May 11, 1943, Senator Thomas P. Gunning, a dentist and member of the Illinois State Dental Society from Princeton, introduced Senate bill 402 before the Illinois Senate. The Senate subsequently passed the bill without a dissenting vote and it was given to the House of Representatives for action. In printed form the bill was titled, "A bill for an act to amend sections 5, 7 and 18b of 'An Act to regulate the practice of dental surgery and dentistry in the State of Illinois and to repeal certain acts therein named', approved June 11, 1909, as amended, and to add Section 5a thereto."

In brief Senate bill 402 would have amended the Dental Practice Act in such a fashion as to make it impossible for those certain commercial dental laboratories who are advertising to and working directly for the public, to continue their unethical practices. In particular, Section 5a, which was to have been added to the Dental Practice Act by Senator Gunning's bill, was necessary.

After passing the Senate, action on the bill was apparently deliberately slowed down in the House, giving its opponents time to organize and act. The first real opposition to the bill appeared when the House Committee of Efficiency and Economy, which had been given the bill for study, approved it by a vote of 5 to 1. The members of this committee are: George A. Williston, Chicago, chairman, John Kulinski, Chicago, J. A. Mueller, Chicago, Charles A. Creighton, Fairfield, Charles W. Clabaugh, Champaign, Nic Keller, Waukegan and M. M. Mueller, East St. Louis. The one dissenting vote in the committee was that of M. M. Mueller, of East St. Louis. Williston only voted present. In passing it might be well to note that the Cleveland Dental Plate Company, Joseph S. Batt,

principal owner, is located in East St. Louis. This is one of the companies which was making dentures by mail and which was legislated against by the recently passed federal Traynor bill banning mail-order dentures. It is one of the companies which fought the Gunning bill and appeared before the committee.

When Senate bill 402 was read at large a second time, the same M. M. Mueller, who opposed it in committee, offered the following amendment and moved its adoption. The proceedings of the House minutes on the subject follow:

Amendment No. 1: Amend printed Senate Bill No. 402 by striking out all of Section 5-A appearing on page 4 of said Bill.

Mr. Sullivan moved to lay the amendment on the table.

The question being on the motion to table, a division of the House was had resulting as follows: Yeas, 52; nays, 74.

And the motion to table was lost.

The question recurring on the adoption of the amendment, on demand of five members, a call of the roll was had resulting as follows: Yeas, 75; nays, 60.

Those voting in the affirmative are:

Allison	Greene, E. A.	Petrone
Armstrong	Gulley	Powell
Ashcraft	Halick	Prescott
Auth	Hannigan	Prusinski
Brands	Harris, H. B.	Quinn
Branson	Hart	Robbins

Garman, Tom M.	Nelson	Weber
Gibbs	Noonan	White, H. J.
Gormley	Nowlan	Wilson
Grebe	O'Neill, Schaefer	Zientek
		Yeas—75

Those voting in the negative are:

Adduci	Friedland	Marzullo

This roll verified.

And Amendment No. 1 was adopted.

Mr. L. C. Harris offered the following amendment and moved its adoption:

Amendment No. 2: Amend printed Senate bill 402 in House by striking the enacting clause.

The amendment was adopted, and Senate bill 402 was ordered to lie on the table.

Naturally those voting "yea" for this Mueller amendment, which struck out Section 5a, defeated the Gunning bill and the cause of organized dentistry. The Illinois State Dental Society feels that these, our representatives who voted affirmatively with and for the amendment of M. M. Mueller are to be censured strongly. They have given certain obnoxious laboratories a new lease on life. When we recall that Joseph S. Batt of the Cleveland Dental Plate Company testified[1] that his company sold about 18,000 plates by mail a year, it can be seen what an odious business these advertising laboratories can become. As there will probably be no meeting of the state legislature for two years this particular cause has been given at least a two year setback.

Mr. Batt, of East St. Louis, and his legal representative are fighting this issue for a certain downstate group. From Chicago, James W. Breen, Ward Committeeman from the 14th ward and representative of certain interests, worked against the bill.

The Illinois State Dental Society and its 5,000 members wishes to thank the members of the Senate for their help with the Gunning bill. We also want to thank all those members of the House of Representatives who worked for passage of the bill and voted against passage of the Mueller amendment. To those members of the Illinois State Dental Society who worked in behalf of the bill much credit and thanks is due.

A.M.A. CREATES NEW HEALTH COUNCIL

A new council on medical practice and public relations was created by the American Medical Association during its recent meeting in Chicago. The purpose of the council is to plan for better medical care throughout the nation. The council will study medical plans of all sorts and suggest policies to state and county medical societies.

A committee to study postwar medical service was also appointed. This committee will study postwar problems, principally the care of the civilian populations in countries occupied by United States soldiers and sailors.

NAME COMMITTEES FOR STATE MEETING

J. T. Yates, of Springfield, has been named chairman of the Local Arrangements Committee for the meeting of the state society to be held in Springfield in May 1944. Other members of the committee are F. A. Stewart, R. E. Blunk, H. P. Robinson, C. F. Deatherage, H. D. Fullenwider, H. B. Singler, R. R. Blanchard, E. R. Ratliff, J. W. Green, George W. Directory of Members

1943

The key to the symbols used in the directory of members of the Illinois State Dental Society will be found on the preceding page. A member's name is followed by his address, component society, school, year of graduation and year in which he became a member of the state society. The symbol "Chi" indicates that the address listed is in Chicago and the name of that city is not repeated. The word "Illinois" has been omitted after all towns and military posts in that state.

Life members of the Illinois State Dental Society are designated by an asterisk, retired members by "Ret." Men in military service are denoted by a dagger. In some cases no address is given for members who are in military service. This is due to restrictions that have been placed upon the publication of military addresses.

This roster of members of the Illinois State Dental Society should be retained by each member as it serves as a valuable reference.

Corrections should be reported immediately to L. H. Jacob, secretary, Illinois State Dental Society, 634 Jefferson Building, Peoria.

Austenal MICROMOLD TEETH

AP AUSTENAL PORCELAIN

THE ONLY TEETH WITH THIS STRONG, MOLDED INTERPROXIMAL RETENTION

Here's the real story of the new Molded Interproximal Retention used on Austenal Teeth.

This scientific principle of retention has advantages not possessed by any other form of retention.

It has proved its strength and security of retention in many thousands of practical cases.

It provides a more natural lingual. This advantage to the patient is alone sufficient to justify its universal acceptance by the profession.

The advanced Micromold Process of making teeth makes possible this stronger, more secure method.

No extraneous metal parts are needed, which in itself is a vast improvement over the conventional retention.

Staining can be done more esthetically and adding-on more easily.

The Molded Interproximal Retention is EXCLUSIVE with Austenal Teeth.

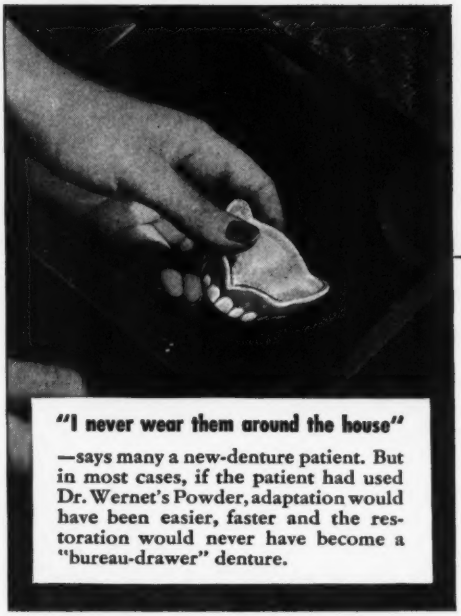
"Bureau-Drawer" Dentures



May be Avoided In 7 Out of 10 Cases by the Use of this Denture Powder

Into the bureau drawer goes many a new, perfectly fitting denture. Yet Dr. Wernet's Powder, in 7 out of 10 cases, would have prevented the patients' dissatisfaction, hastened adaptation to the new dentures.

Dr. Wernet's Powder is acceptable on sight to the patient, easy and pleasant to use because of its delicacy and purity. It helps adapt the patient to the new denture and is good insurance against unfounded dissatisfaction or criticism.

Impartial laboratory tests prove Dr. Wernet's Powder to be 26.1% whiter and purer than the average of leading competitors; 50% more viscous (for maximum security) and 46.5% more absorbent (for faster denture control).

FREE SUPPLY on Request to Wernet Dental Mfg. Co., Dept. 8-G, 190 Baldwin Ave., Jersey City, N. J.

The basic ingredient of Dr. Wernet's is the same as is used in the making of fine ice cream.

TEST:

Use 5 grains alloy to 8 grains mercury. A trifle more mercury will not be harmful. Combine them thoroughly and at that step where it is necessary to expel the excess mercury you will note that FELLOWSHIP ALLOY has plenty of pep and a very crisp feeling as you rotate it between the thumb and forefinger.

ALL-METAL PARTIAL

An all-metal restoration is the first choice of dentists seeking greater strength and permanence . . . freedom from breakage . . . a more perfect fit. And the first choice among metals is, of course, Nobilium, the chromium, cobalt alloy of noble performance.

SKELETON METAL CASE

But if your patient can't afford an all-metal partial . . . a skeleton metal case, cast of Nobilium in combination with your preferred acrylic is the next best choice—and a thoroughly satisfactory one, at that! For enduring service, for the maximum in esthetic satisfaction . . . use Nobilium in every denture combined with acrylic materials. Call on your local Nobilium processor, or write us direct for descriptive literature.

Our New Technique

We are processing all of our resin cases at a low temperature and over a long period of time, from eight to ten hours. This eliminates checked teeth and porosity—two of the greatest evils the technician has had to contend with.

With this new technique we get a denture more dense, stronger and a better shade of pink.

We now offer you genuine methyl methacrylate and all the standard resins, Crystolex, Lucitone and Vernonite dentures.
